

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

CLAIM 1: (currently amended) A drain trap for a sink, the sink having an influent drain line and an effluent exit line comprising, a drain trap which fits between the sink influent drain line and the sink effluent exit line, the trap having a transparent dome shaped lower trap bowl, the lower trap bowl having a cone-shaped indicator fixedly attached to the bottom thereof, the lower trap bowl threadably attached to a sealed cover, said lower trap bowl and cover tightened and removable by hand, without the use of tools, a vertical conduit inside of said cover, which is an integral part of said cover and formed monolithically as a part of the cover, the vertical conduit having an inside diameter equal to, or slightly larger than, the diameter of the sink influent drain line, the lower end of said vertical conduit extending below the water line in the trap, said vertical conduit adapted to receive the sink influent drain line, a horizontal conduit exit line, formed monolithically as a part of the cover, above the dome shaped lower trap bowl, the horizontal conduit

exit line having a flexible conduit segment and ~~being an integral part of the cover,~~ the horizontal conduit exit line having an inside diameter equal to or greater than the sink influent drain line.

CLAIM 2: (currently amended) The drain trap ~~device~~ of Claim 1 further comprising structure ~~means~~ to seal the connection between the sink influent drain line and the vertical conduit, and structure to seal the connection between the horizontal conduit exit line and the sink effluent exit line.

CLAIM 3: (currently amended) The drain trap ~~device~~ of Claim 2 in which both said structures are said means ~~is a~~ compression ~~nut~~ nuts.

CLAIM 4: (canceled)

CLAIM 5: (canceled)

CLAIM 6: (currently amended) The ~~device~~ drain trap of Claim 1 in which the dome trap is made of plastic.

CLAIM 7: (currently amended) The ~~device~~ drain trap of Claim 1 in

which the cover, vertical conduit and horizontal exit conduit line are all injection molded monolithically as a single integrated unit.

CLAIM 8: (currently amended) A drain trap for a sink, the sink having an influent drain line and an effluent exit line comprising, a drain trap fitting ~~which fits~~ between the sink influent drain line and the sink effluent exit line, the trap having a dome shaped lower trap bowl, the lower trap bowl threadably attached to a sealed cover, said lower trap bowl and cover tightened and removable by hand, without the use of tools, a vertical conduit inside of said cover, ~~which is~~ and an integral part of said cover and formed monolithically as a part of the cover, the vertical conduit having an inside diameter equal to, or slightly larger than, the outer diameter of the sink influent drain line, the lower end of said vertical conduit extending below the water line in the trap, said vertical conduit adapted to receive the sink influent drain line, a horizontal conduit exit line above the dome shaped lower trap bowl, the horizontal conduit exit line being an integral part of the cover and formed monolithically as a part of the cover, the horizontal conduit exit line having an inside diameter equal to or greater than the sink influent drain line.

CLAIM 9: (currently amended) The drain trap device of Claim 8 further comprising ~~means~~ structure to seal the connection between the sink influent drain line and the vertical conduit, and structure to seal the connection between the horizontal conduit exit line and the effluent exit line.

CLAIM 10: (currently amended) The device of Claim 9 in which ~~said means~~ both said structures are ~~is a~~ compression ~~nut~~ nuts.

CLAIM 11: (canceled)

CLAIM 12: (canceled)

CLAIM 13: (currently amended) The ~~device~~ drain trap of Claim 8 in which the dome trap is made of plastic.
